Phase I - Equitable Access to Effective Educators School Diagnostic

Introduction

National data show that poor and minority students, English Language Learners and students with disabilities continue to be taught more often than their peers by inexperienced, out-of-field or ineffective teachers. As a result, the United States Department of Education (USDE) required states to develop equity plans and use evidence based strategies to address this issue. Kentucky's plan is focused on teacher preparation; recruitment, hiring and placement of teachers; providing supports for on-going, job-embedded professional learning; and strategies to retain teacher and leaders.

All districts and schools in Kentucky are required to identify barriers and develop strategies to address these issues to achieving equitable access to effective educators for students most at risk. This is being incorporated within the Comprehensive District and School Improvement Plans. This diagnostic should be used as tool for identification of barriers and a catalyst for development of strategies that will result in novice reduction for gap closure. Strategies will be incorporated into the Comprehensive School Improvement Plan.

School Equity Data (1)	<p>Complete the School Equity Data tab for this diagnostic. Include at least one other self-selected indicator for consideration.</p> <p>*Self-selected data could come from a variety of sources. It should be relevant to the needs of the school. Examples could include: principal, teacher or student demographic data; percentage of National Board Certified Teachers or Advanced Degrees; teacher or principal effectiveness data, TELL, turnover.</p> <p>**The school should complete the information in the chart ONLY for the subgroups reported in the School Report Card where the data has been suppressed to protect student identification required by the Family Educational Rights and Privacy Act (FERPA). Follow the steps below:</p>	I acknowledge that I have uploaded the School Equity Data.		School Equity Document

Provide a brief analysis the school data from the chart. Include any trends, note-worthy data points or perceptions the data has provided related to equitable access to effective educators.

We would like to have more teachers working toward and achieve National Board Certification in all content areas. We believe that having the most highly trained and motivated teachers is directly correlated to student success. We will begin to explore options to encourage more teachers to seek their National Board Certification.

After the data analysis is complete, the school will then identify the barriers (challenges) for some of the identified trends. An identified barrier, for example, could be higher teacher turnover in priority schools as compared with non-priority schools. Once the barriers have been identified, then root causes of why the barriers exist will be included.

Family support and involvement, students' future expectations, individual support for transition to post secondary school life. Current social-economic situations seems to be the primary root cause for most identified barriers.

Goal Setting (4)	<p>Complete the School Equity Goals tab. Use the school's most recent measures in the Equity tab of the School Report Card to set equitable access goals for the next three years. The measures include: Working Conditions, Overall Teacher and Leader Effectiveness, Overall Student Growth, Percentage of new and KTIP teachers, and Percentage of Teacher Turnover.</p> <p>***Goals should reflect an analysis of barriers, root causes and strategies.</p>	I acknowledge that I have uploaded the School Equity Goal Data. Comprehensive School Improvement Plan

Johnson Central High School

Equitable access to effective educators must be reflected in the Comprehensive School Improvement Plan. Strategies could include, but are not limited to, recruitment; hiring and placement of teachers and/or students; providing supports for on-going, job-embedded professional learning to improve teacher and leader effectiveness; and strategies to retain teacher and leaders, particularly in high needs schools. Once implemented, these should assist the school in meeting the goals set in the previous section.

If there are strategies and activities within one of the five major goals of the CSIP, which adequately addresses equitable access, the school may select the appropriate goal, objective, strategies and activities.

OR

The school may create a new goal to address equitable access to effective educators. Once a new goal has been created, the school will need to include appropriate objectives, strategies and activities.

The school may choose to provide an optional narrative response to include any additional information, but this is not required.

Goal 1:

Students at Johnson Central High School will be College and Career Ready (CCR) by meeting the established CCR delivery target (71.6) by 2017

Measurable Objective 1:

demonstrate a proficiency by being College and Career Ready (CCR) by meeting the CCR target (71.6) by 05/31/2017 as measured by the CCR delivery target..

Strategy1:

Professional Learning - Teachers will use current assessment and survey data to develop their professional learning plans. Professional Learning Plans will be monitored by the Leadership Team and district level staff. Teachers will have some degree of flexibility in developing their individual plan, as approved by the Leadership Team.

Phase I - The Missing Piece

Introduction

This report provides a comprehensive response to the six objectives of The Missing Piece set for the by the Commissioner's Parent Advisory Council (CPAC). This diagnostic uses performance measurement and progress, as well as relationship building, resources and support to build capacity within schools and districts measure parent involvement and the desired outcome being made. Use the links below to navigate the diagnostic content and respond to the questions.

	Statement or Question	Response	Rating
7.5	Parents make active use of the school's resources and community resources and report that they provide meaningful help to resolve family challenges that could interfere with student learning. (For example, FRYSC or Title I coordinators connect family with community resources and follow up).	School staff and parents have seamless integration of consistent and sustained family support services from school and the community to reduce student barriers to learning.	Distinguished

	Statement or Question	Response	Rating
7.6	School staff offers and publicizes community-based learning activities aligned with the curriculum, such as tutoring linked to the curriculum and internships, for all students and parents.	District staff and school leadership ensures all stakeholders are aware of community based learning opportunities that are linked to student-specific needs.	Distinguished

Reflection

Reflect upon your responses to each of the Missing Piece objectives.

We believe that our strengths are the way our school builds productive, caring and personal relationships with the parents/guardians of our students. Many forms of communication are used to ensure that parents are aware of the academic achievement of their child and the success of our school as a whole. Although we do not have a lot of parents who are leaders in terms of their time and resources, we have many hours donated annually for participation, coaching, volunteering, etc. We believe that in order to sustain these strengths, we need to continue offering opportunities and advocating for programs to partner with our school to impact student learning and success. JCHS does survey parents regarding needs, services, programs, etc. This data is mostly collected through the FRYSC. We use the data we collect to help impact our decision making.

Improvement Plan Stakeholder Involvement

Introduction

The responses should be brief, descriptive, and appropriate for the specific section. It is recommended that the responses are written offline and then transferred into the sections below.

Improvement Planning Process

Improvement Planning Process

Describe the process used to engage a variety of stakeholders in the development of the institution's improvement plan. Include information on how stakeholders were selected and informed of their roles, and how meetings were scheduled to accommodate them.

The process to engage a variety of stakeholders in the school improvement plan begins with data from numerous resources. Information gained from these resources guide the membership of the teams that review the data to ensure the overall goal of providing a successful learning environment for students. All teachers belong to a Professional Learning Community within the school that guides much of how we go about reviewing data to impact learning outcomes. The Youth Service Center and its Advisory Council serve as a team of stakeholders composed of parents, teachers, administrators and community liaisons.

Describe the representations from stakeholder groups that participated in the development of the improvement plan and their responsibilities in this process.

Numerous stakeholder groups are utilized to develop strategies and activities to improve the learning environment. These groups represent the idea that it takes a whole group of concerned student advocates to prepare them for the next level. Each group plays a different role in their advisory, assistance and/or resources to the total school program. Groups utilized are: Teachers, Teacher Team Leaders, Parents, Administrators, YSC Director, SBDM Council, Community Partnerships.

Explain how the final improvement plan was communicated to all stakeholders, and the method and frequency in which stakeholders receive information on its progress.

The CSIP is communicated to all stakeholders through a tiered method ensuring all interested persons receive the information. The CSIP is reviewed for approval once all stakeholders have had time to provide input based on a variety of data resources (KPREP, TELL Survey, CCR, CTE, Val-Ed Survey, Student Voice, YSC Data.) The CSIP is then approved by the SBDM. Leadership teams and administration at the school level review the CSIP on a quarterly and/or semester basis ensuring progress notes are made toward goals.

Phase I - Needs Assessment

Introduction

The purpose of the School Needs Assessment is to use data and information to prioritize allocation of resources and activities.

Data Analysis

What question(s) are you trying to answer with the data and information provided to you? What does the data/information tell you?

What does the data/information not tell you?

From implementation of the plan we expect to see reasonable and steady progress in student achievement on state and classroom assessments. The CSIP will be documented through completion of ongoing checks and reviews by our principal and department chairs. Periodic updates will be provided to the Board of Education. Additionally, our CSIP was reviewed by our school council and faculty. We are trying to identify areas of strengths so that we may build upon those areas while also identifying those areas that need to be focus areas for improvement. Writing and english / language arts stands out as a strong area with significant improvement this past year. Clearly mathematics (Algebra II EOC) remains a area for targeted improvement. We have too many students scoring in the novice range in all content areas. We need have more students achieve CCR benchmarks, although this is also an area of strengths. While our senior ACT performance is at a five year high; our junior (school wide) ACT performance remains level and needs to become a focus area for improvement. The KPREP data does not identify root causes or issues of concerns. We rely on other data such as TELL, ValEd, Student Voice, classroom performance, etc. to help us gather that data that is sometimes more subjective in nature. The Leadership Team has also began individual conversations with all students in hopes of better utilizing student input

Areas of Strengths

What were the areas of strength you noted? What actions are you implementing to sustain the areas of strength? What is there cause to celebrate?

Our English and Writing scores continue to grow significantly. We plan to sustain these growths by continuing to ensure that all courses are taught with appropriate levels of rigor and all students have the same expectations of learning. We also celebrate our College and Career Readiness Scores and will continue to direct our instruction in career pathways to ensure our students are prepared for higher education. While there is cause for celebration and we are proud to be a proficient school; our goal is to reach the 90th percentile over the next two years.

Opportunities for Improvement

What were areas in need of improvement? What plans are you making to improve the areas of need?

All of our core classes need improvement, but emphasis in particular needs to be placed in math and science. We realize to be able to improve in math; we are going to have to individualize instruction for each student through the use of technology, tutoring, and differentiation. We have addressed this with by restructuring the math curriculum and offering intervention classes to all students based on the available data. We have added three new mathematics teachers and are greatly encouraged by their enthusiasm and eagerness to improve teaching and learning for all students. In science; our teachers understand the importance of shifting to student-centered learning. More labs will be taking place to reinforce what is being taught, as we shift toward more fully implementing the Next Generation Science Standards. We are also making a more focused effort for students at all grade levels to have more ownership of their student data and progress. We have also implemented parental contact logs maintained by all teachers with requirements on when and how parents must be contacted. Our hope is that our parental involvement will increase thus increasing student achievement.

Conclusion

Reflect on your answers provided in the previous sections. What are your next steps in addressing areas of concern?

We are always working toward our ultimate goal of doing the best we can to provide for the future success of all students. Key next steps will be the monitoring and refining of those changes we have implemented, such as the new math intervention classes, to accurately evaluate the overall impact on student learning.

Also keys steps is working to ensure that all staff share our core values, and feel empowered to have a positive impact in our school community.

Phase II - KDE Compliance and Accountability - Schools

Introduction

The process of Improvement Planning in Kentucky is used as the means of determining how schools and districts will plan to ensure that students reach proficiency and beyond by 2015. The process focuses school and district improvement efforts on student needs by bringing together all stakeholders to plan for improvement, by focusing planning efforts on priority needs and closing achievement gaps between subgroups of students, by building upon school and district capacity for high quality planning, and by making connections between the funds that flow into the district and the priority needs in schools.

Your school's plans for improvement must be based on careful and honest analysis of data, address all content areas, and clearly address gaps in student achievement.

Planning and Accountability Requirements

The school has identified specific strategies to address areas for improvement identified in the TELLKY Survey results.

Goal 1:

Students at Johnson Central High School will be College and Career Ready (CCR) by meeting the established CCR delivery target (71.6) by 2017

Measurable Objective 1:

demonstrate a proficiency by being College and Career Ready (CCR) by meeting the CCR target (71.6) by 05/31/2017 as measured by the CCR delivery target..

Strategy1:

Professional Learning - Teachers will use current assessment and survey data to develop their professional learning plans. Professional Learning Plans will be monitored by the Leadership Team and district level staff. Teachers will have some degree of flexibility in developing their individual plan, as approved by the Leadership Team.

Executive Summary

Introduction

Every school has its own story to tell. The context in which teaching and learning takes place influences the processes and procedures by which the school makes decisions around curriculum, instruction, and assessment. The context also impacts the way a school stays faithful to its vision. Many factors contribute to the overall narrative such as an identification of stakeholders, a description of stakeholder engagement, the trends and issues affecting the school, and the kinds of programs and services that a school implements to support student learning.

The purpose of the Executive Summary (ES) is to provide a school with an opportunity to describe in narrative form the strengths and challenges it encounters. By doing so, the public and members of the school community will have a more complete picture of how the school perceives itself and the process of self-reflection for continuous improvement. This summary is structured for the school to reflect on how it provides teaching and learning on a day to day basis.

Description of the School

Describe the school's size, community/communities, location, and changes it has experienced in the last three years. Include demographic information about the students, staff, and community at large. What unique features and challenges are associated with the community/communities the school serves?

Johnson Central High School is located in the mountains of eastern Kentucky in the rural community of Paintsville, Kentucky. The student population at Johnson Central is approximately 1,150. The students are supported by staff of 85 teachers and support staff. This makes our school one of the larger high schools in eastern half of the state. The overall population of Johnson County is approximately 23,000. Many of our families have been adversely affected by the declining coal industry during the past three years. Our free & reduced student population continues to rise because of the recent economic downturn in the region. The Leadership Team and staff continue to refine our core values and purpose statement. The continued economic challenges in our region remains a concern as we strive to prepare every student for future success. We have added a number of new staff members over the past two years due to retirements. We are pleased with the enthusiasm and content knowledge of the newest staff members. We truly believe this will translate into increased student achievement.

School's Purpose

Provide the school's purpose statement and ancillary content such as mission, vision, values, and/or beliefs. Describe how the school embodies its purpose through its program offerings and expectations for students.

The mission of Johnson Central High School, as a large, progressive high school in Eastern Kentucky is to ensure for each student, through exemplary instruction and leadership, a superior educational experience in all academic areas. Through the unified effort and shared responsibility of students, parents, school personnel and the community, this experience will serve as the bridge for students to become productive members of society and lifelong learners. Our school offers one of the largest and most diverse curriculums in the state including our College and Technical Education programs provided on-site. The wide range of college courses, dual credit, Advanced Placement, and our Early College Academy programs make it possible for our students to complete at least two years of college before graduation. Our school has an established a set of shared expectations for all students and staff.

In short, our purpose is to maximize future opportunities and success for all students.

Notable Achievements and Areas of Improvement

Describe the school's notable achievements and areas of improvement in the last three years. Additionally, describe areas for improvement that the school is striving to achieve in the next three years.

This past year we achieved a combined score of 73.8 on the state's accountability measure. This is a two point increase from the previous year. We have seen significant increases in our CCR measures during the past three years. We have made significant increases this school year on our ACT student performance. Our primary focus areas moving forward will be mathematics and writing for all students. We have increased the number of AP courses that we now offer to eighteen and the number of career majors to twenty-seven. All career majors have a Honors pathway that may be completed by any student. We also are collaborating with our regional colleges, Morehead State University and University of Pikeville to offer several dual enrollment courses for our students. We plan to continue to increase the number of courses offered to our students. We also work with our local community college, Big Sandy Community and Technical College, to offer remediation and articulation courses. We also have our Early College Academy Program which allows students to enroll in college at the start of their junior year in high school. Our Academic Team finished as the State Runner-Up at the 2016 KAAC Governor's Cup Competition. Our Football Team won the State Championship (Class4A) for the 2016 season. Several other extra-curricular teams/organization won the regional and/or did extremely well at the state/national level. All of these add to our general positive school climate and overall school spirit and student involvement.

Additional Information

Provide any additional information you would like to share with the public and community that were not prompted in the previous sections.

A variety of stakeholders have been involved throughout the planning process (certified personnel, classified personnel, administrators, SBDMs, students, parents, community members, board members, . . .)

Our CSIP and other important information will be shared with stakeholders through the following:

1. Eagle Express (School / Local Newspaper)
2. The 2016-2017 plans will be posted on the district's website
3. Printed copies of the CSIP plans will be available at our school and at the reception area at Central Office
4. District administrators, Board of Education members, and all staff members will receive a copy.
